Subject: RE: end of shift briefing bullets

- EPA Region 6 has been working closely with TCEQ and local responders on the Arkema facility in Crosby Texas. Several conference calls have been held with response agencies and the facility to ensure options are considered.
- The TAGA (Trace Atmospheric Gas Analyzer) vehicle is in route to assist with air monitoring in the impacted areas to ensure the safety of responders and residents returning to their homes.
- We have received 36 hurricane-related spill/release calls to date. Most have not been significant releases.
- EPA's Aspect aircraft started flying today to look for spills in the water, and clusters of orphaned containers.
- Continuing calls with TCEQ to water/wastewater facilities. Will post latest table to WebEOC in morning.
- Several of our Superfund sites were impacted by the flood waters, will work to assess those impacts.

With Regards, Steve

Subject: end of shift briefing bullets

Hi everyone,

Please submit your end of shift briefing notes by 1830. Kent wants to see them before the brief so he can ask any questions beforehand vice during the brief.

Thanks!
